A new content type has been introduced: Lake For Sale

Only users with the Lake Seller role can own a Lake For Sale listing. If no such users exist, they need to be created first.

A new category for lakes has been added: Carp Lakes for Sale in France
This category should be assigned to lakes intended for sale, following the existing functionality.

A new listing page for lakes available for sale has been added:
Lakes for Sale:
https://ogaik5s7ow.dreamcarpholidays.com/listingcategory/%d1%81arp-lakes-for-sale-in-france
(Please note: the map on this page is currently not working due to known reasons (we would need the map ID.)

Relevant filters have been implemented on the lakes-for-sale listing page.

The individual lake page for sale listings has been styled minimally to meet basic design requirements.
(If no lakes are currently available, you may need to create a test listing.)

I have created a test lake - link below:

https://ogaik5s7ow.dreamcarpholidays.com/france-for-sale/redmire-pool

I have populated fish stock, facilities tab and ferry ports but they are not appearing

A contact form and owner messaging functionality have been added via a button on the listing page.

I submitted an enquiry however, the lake seller did not receive email notification.

Enquiry also did not appear in seller account

The enquiry did appear in admin under 'enquiries' -
https://ogaik5s7ow.dreamcarpholidays.com/wp-admin/edit.php?post_type=enquiry

Need to create separate category for 'enquiries lakes for sale'

A space appears between £ and 3000. Space needs to be removed to it reads £300000

A simplified admin panel for users with the Lake Seller role has been implemented, showing only the necessary menu items and current functionality.
(Please test this section — some features might not yet fully support the new lake type.)
