

# Noor Platform - Remaining Work Specification

## Current Status

The Noor platform is halfway through development. Key infrastructure and basic functionality are in place. However, several essential features remain incomplete or unimplemented. This document summarizes the pending tasks and feature requirements to allow a developer or agency to seamlessly pick up the remaining work.

## 1. Account Creation Enhancements

- Capture full name, company name, phone, email, country, and city during sign-up.

## 2. User Roles & Permissions

- Super Admin: Delete accounts, view all users, manage credits, create Admins.
- Admin: Manage users without Admin creation privileges.

## 3. Campaign Language Setting

- Allow language selection during campaign creation.
- Ensure all interview interactions follow selected language.

## 4. Interview Interface Adjustments

- Re-add microphone button (start/stop).
- Increase silence tolerance before timeout.

## 5. Submission Controls & Feedback

- Enable max submission limit per campaign.

# Noor Platform - Remaining Work Specification

- Show retries remaining post-interview.
- Redirect to thank you message upon final submission.

## 6. Candidate Email Dispatch

- Add SEND button to campaign page.
- Allow email sharing with selected candidates via mailing list.

## 7. Submission Review Interface

- Introduce tab layout: Overall Rating, Resume Analysis (with scores), Questions & Answers (with per-question score).

## 8. Credit System & Subscription Plans

- Define interview cost: 10 credits per interview.
- Create 3 subscription tiers:
  - \$40/month -> 5,000 credits
  - \$60/month -> 8,000 credits
  - \$80/month -> 15,000 credits
- Deduct credits automatically when interviews are launched.
- Admin interface to adjust/view credits per client.
- Display wallet and allow top-ups.

## 9. Billing & Payments

- Integrate Stripe (or alternative) for monthly payments.

## Noor Platform - Remaining Work Specification

- Link credit allocation to subscription payment.
- Provide invoices and transaction history.

### 10. Smart Interview Invitations

- Batch Resume Parsing: Upload multiple resumes and extract emails using OCR and NLP.
- Candidate List Compilation: Automatically build an email list with manual review option.
- Unique Link Generator: Create a secure, single-use link with an access code per candidate.
- Send Workflow: One-click bulk send with link, interview info, and optional deadline.
- Security & Tracking: Links are time-limited and usage is tracked in the admin dashboard.
